PROJECTS

Chortle Portal
Angular 1.6, MongoDB, Amazon Web Services S3, MapBox, Node.js, JavaScript, jQuery, CSS, HTML5, Firebase, Heroku

Chortle Portal is a light-hearted, social application that physically connects users to the world outside of their phones. From street art to a comical pedestrian, users can take pictures, add comments and drop the content to that specific location on the map to be viewed by friends at a later time.

INKr
JavaScript, jQuery, SCSS/CSS, HTML 5, Firebase, ComicVine API, HTML Canvas

INKr's primary function is to instill creativity and jaunty fun while interacting with comic book characters new and known to the user. With accss to a variety of colors and textures, the user becomes the artist and can illustrate the character's setting similar to how they would in a coloring book.

Paper Doll
React, PostCSS, Gulp, LostGrid, Amazon Web Services S3, PostgreSQL, Knex.js, Node.js

Whether the user has an established sense of dress or is still developing their visual identity, Paper Doll is a resource for them to cultivate and explore their individuality. This personal apparel application lets users upload images of their clothing and store them based on type. Also, the user can build combinations from their clothing and store them in an Outfit Schedule
